International Union of Theoretical and Applied Mechanics
N-2011-1       June 2011

President’s Address

It’s been a quiet few months in IUTAM, apart from the work of the Congress Committee Secretary who, in collaboration with our Chinese hosts, is assiduously preparing for the 23rd ICTAM in Beijing next year. The Secretary-General and Treasurer have been in contact with representatives of the mechanics communities in two countries, Bulgaria and Korea, with whom IUTAM has in recent years had very limited communication. I am happy to say that it looks as though successful resolutions of the difficulties have been negotiated, and agreements with institutions in both countries are expected to be ratified by the Bureau at its meeting in Cambridge (England) in August this year.

In response to a request from ICSU, IUTAM put forward a nomination for a member to serve on the Steering Committee of the 10-year ICSU initiative on Earth System Research for Global Sustainability, a topic in which IUTAM has widespread expertise and interest. Unfortunately our nominee was not appointed to the Steering Committee (now called the ‘Transition Team’). However, IUTAM is one of the International Unions that are contributing to the IUGG (International Union of Geodesy and Geophysics) “Grand Challenge in Natural Hazards Research and Risk Analysis”; indeed, more or less as I write, Professor Paul Linden is on his way to the IUGG Congress in Melbourne, Australia, where he will represent IUTAM in a symposium with the above title. In addition, there has been welcome contact with the President of the International Mathematical Union (IMU), Professor Ingrid Daubechies in France, and we have agreed that there should be increased interaction between our two Unions, especially in our responses to initiatives from ICSU. Thus we have jointly put forward a candidate for the Executive Committee of ICSU, for which elections will be held during the ICSU General Assembly in Rome in September 2011. We have also agreed to support IMU in its global initiative to develop mathematical activities in relation to studies of our planet and our society. It would be good if IUTAM could develop yet more collaboration with other International Unions as well.

In recent months we have been emphatically reminded of the powerful impact that mechanical events can have on the Earth and the communities
that live upon it. We have seen the earthquake and tsunami in north-eastern Japan, floods in the Missouri river basin in the USA, and new clouds of destructive ash emitted by volcanoes in both the northern and the southern hemispheres, not to mention the ‘interesting’ fluid mechanics revealed by the blow-out of the Deepwater Horizon oil well in the Gulf of Mexico. Prediction of such events, and protection from their consequences, seem still to be very inadequate. I believe that mechanical scientists and engineers will need to be deeply involved, for a long time, not only in developing greater scientific understanding of the problems and technological solutions to them, but also in the political process through which governments will, we hope, be persuaded to protect their citizens.

Cambridge, 26 June 2011

Tim Pedley
President of IUTAM
Cambridge
From the Office of the Secretary General

*IUTAM Report 2010:*

The IUTAM Report 2010 will be printed in July 2011 and sent by post in September 2011.

It contains in particular the minutes of the General Assembly held in Paris, France, in July 2010.

*Summer 2011 meetings of the Bureau and the XCCC:*

The summer 2011 meetings of the Bureau and the XCCC will be held in Cambridge, UK, on 13 and 14 August.

Agenda items to be discussed at the Bureau meeting are:
- Matters concerning Adhering and Associate Organizations
- Matters concerning Affiliated Organizations
- Matters concerning IUTAM Working Parties
- Matters concerning ICSU
- Reports by the Treasurer and the Secretary-General
- Publication of Proceedings
- Proposal for evaluating Symposia applications every year
- Follow-up actions of 2010 General Assembly meeting

*Call for Symposia and Summer Schools 2013-2014:*

The call for the next wave of IUTAM Symposia and IUTAM Summer Schools is now open online. The deadline for submission is 1st April 2012.
